Here are the guidelines to make sure that we're all safe and prepared for Photo day:

- No more than 6 people can come for each block. Feel free to choose your own groups.
- Please DO NOT LINGER at the scene. We want to be COVID responsible, so we ask that you leave the scene at the end of your photos to enable appropriate distancing. No soliciting!
- Please bring a face mask for before and after the photos.
- Please do not leave gaps in the schedule, try to fill out the earliest time slots first. We want to make effective use of the photographer's time.
- Clothing tips from Wendy, the photographer:
 - When deciding on your clothing, think about who will be looking at your image. Are you in the suit category, or maybe business casual or casual. The image will represent who you are, your first impression!
 - Solids tend to photograph better than big bold patterns.
 - Try to stay away from heavy contrasts such as Black Suit, White shirt. The White will be so bright it takes the attention away from you to the shirt. Off white is better, and if your personality has colour, go for it! Use colour to stand out. Guys you can have a colourful tie, ladies colour blouse or jewelry.
 - Also Long sleeves tend to photograph better than short sleeves
 - Ladies, don't worry about makeup too much, wear what you normally do. If you do want to do more, concentrate on your eyes, "evening" makeup.
 - For everyone, dry lips are happening these days so if you have some lip balm or even just have a drink of water just before the shoot, to dampen them, that will help.
 - This image is all about you! Lets have some fun!
